

Application for Special Use Permit for Scientific Study Arctic National Wildlife Refuge

Describe the study you plan to conduct.

Describe why your research needs to take place on the refuge and how the refuge will benefit from this research?

List any of your publications that directly relate to the study being proposed.

List the names of the individuals involved and the functions they will perform.

How will your group be transported to/from the refuge and how will you move from location to location on the refuge?

Will you need to establish a fuel cache? And if so, how much fuel will you store?

When will you perform your research?

What equipment will you be utilizing?

Will you be establishing a base camp?

What precautions will you use to reduce the risk of bear interactions and injury from bears?

How do you propose to deal with food storage and waste (food and human)?

Do you propose to work within the Refuge's designated wilderness area?

If so, do you propose to access the area by helicopter? If so, please explain why helicopter access is necessary for your study.

If you plan to work in the wilderness area, will you be utilizing any motorized or mechanized equipment? If so, please describe the equipment proposed for use and why this equipment is necessary.
